

# Device Qualification IQ | OQ

Biosealer® TC

Order No.: S873SIQOQ

## Benefits

- 100% traceable documentation right from the beginning
- All required certificates provided
- Comprehensive IQ | OQ documentation
- Compliance with the requirements of GLP | GMP standards
- Strict Sartorius test standards
- Specially trained service technicians will support you during your product qualification

## Product Information

Prerequisite for validation of your processes is qualification of the devices used. This is why qualification of measurement systems is obligatory in many areas of the pharmaceutical industry.

Sartorius supports you in GLP/GMPcompliant device qualification with an expert team of trained specialists. Devicespecific reports and documentation can easily be integrated in existing QM systems.

## Specifications

- Device qualification and documentation are based on device-specific qualification documents
- Check and documentation of scope of delivery and provided documents
- Check of device for transport damage and documentation
- Installation and commissioning of device
- Documentation of device installation
- Functional check acc. to specifications, incl. documentation of results
- Brief instructions to operating personnel at workstation (not application training) with documentation
